

Dear Parents,

We have just completed TechnoSurvivor. In this project, campers arrived on "Technoland", where they had to out-think, out-decode, and out-assemble their opponents. While on the island, tribes were formed in order to compete against one another in various computer-related challenges including Computer Trivia, Binary Code Cracker, and Computer Rescue. The tribe to win the most rewards was granted the title "TechnoSurvivor."

Campers acquired and enhanced the following technical skills:

Content Knowledge

- understand the function of computer parts including motherboard, CPU, ROM, RAM, memory device, hard drive, graphics card, sound card, keyboard, and mouse
- understand the purpose of binary code
- correctly assemble a computer

Operating Environment

- open and close a program
- open and close a file
- save a file
- print a document

Word Processing

- add text to a word processing document
- format the font, font size, and font style of text
- insert a picture file
- format the picture style, shape, border, and effects
- edit WordArt
- format the style, fill, border, and shape of WordArt

Spreadsheet

- enter a value into a cell

Telecommunications

- use a search engine
- select an appropriate search term

We look forward to seeing your child again at TechnoCamp.
