Dear Parents,

We are working on the computer project **TechnoArtist**. During this unit, students enhance mouse skills and acquire knowledge about how the computer can be used as a tool for creating graphic artwork. Your child has been studying famous artists and their paintings to learn about artistic elements and different styles of art. They have then painted their own masterpieces using the software Microsoft Paint.

One of our upcoming artistic projects is a pet portrait. We are asking students to bring in a photograph of their pet. If your child does not have a pet, they should bring a picture of a pet they would like to own. Photographs and pictures will be returned upon the completion of the pet portrait.

Thank you for your cooperation,
