

How you can help!

- Don't eat shark fin soup 
- Don't buy makeup products with shark liver oil in it
- Don't buy phony medicine with shark cartilage included
- Don't buy shark teeth jewelry
- Don't buy shark jaws as a souvenir
- Don't buy shark skin wallets

SHARK FINNING

Shark finning is when sport fishermen cut off shark's fins. Most of the sharks are still alive when their fins are being cut off. After the fishermen get what they want **they throw the finless shark back in the ocean to die** by either getting eaten by other fish or by dying a very slow death at the bottom of the ocean.

Shark's need your help!

INTERESTING FACTS

- **Less than 12 people are killed a year by sharks worldwide. More golfers are struck by lightning and killed than by shark attacks.**
- **Over 8,000 tons of shark fins are processed each year.**
