Our mission is to combine education and technology to provide children with the core computing skills that will best prepare them for the future.

About Us

TechnoKids publishes digital literacy and coding curriculum. **Our mission is to combine education and technology to provide children with the core computing skills that will best prepare them for the future.**

Our story began in 1993, when Scott Gerard opened the first TechnoKids learning center in Oakville, ON, Canada. As computers became widely available in education, our office moved into a school. Alongside teachers, we started to develop project-based activities to support technology integration and STEM.

Today, there are "techno" kids in over 50 countries. Although applications and devices are different, our commitment remains the same. Every day we strive to develop creative, meaningful lessons that empower students.

About Our Curriculum

Any Device

Digital literacy activities can be used on a Windows, Mac, or Chromebook

Download Instantly

Access Google, Microsoft, Adobe, and coding lessons from an online library.

Project-Based

Each technology project includes a teacher guide, workbook, and resources.

Import into LMS

Work from school or home. Upload files into a Learning Management System.

Unlimited Users at Site

No need to count students or devices. Ideal for schools and learning centers.

No Renewal Fee

Pay a one-time fee. Updates are free. Purchase is not a subscription.

Choose the Right Project for Your Students

TechnoKids has over **40 technology projects**.
Answer the questions to find projects that fit your students' needs.

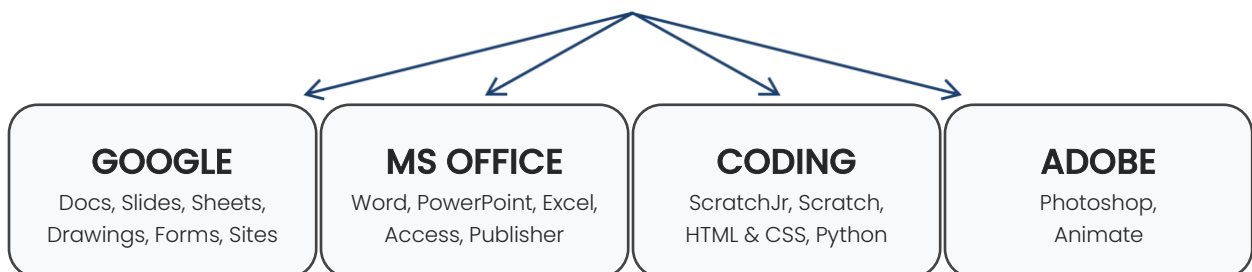

What is the grade level of your students?
Match the Collection to students' grade level.

Which project should you pick from a grade level?
Determine the instructional goal.

Which applications are available?
Narrow down the project based on software availability.

Primary Projects

A collection of 9 projects teach **fundamental** skills. Publish stories, create a digital art gallery, design a slide show, and more!

TechnoBookmaking

Publish accordion, flip, & folding books.

TechnoFit

Design a food guide, poster, and menu.

TechnoGallery

Paint artwork and display in a gallery.

TechnoPainter

Draw, color, and edit artwork using Paint.

TechnoStart

Earn a computer license.

TechnoStories

Write stories with templates.

TechnoTales

Code a fairy tale.
Animate events.

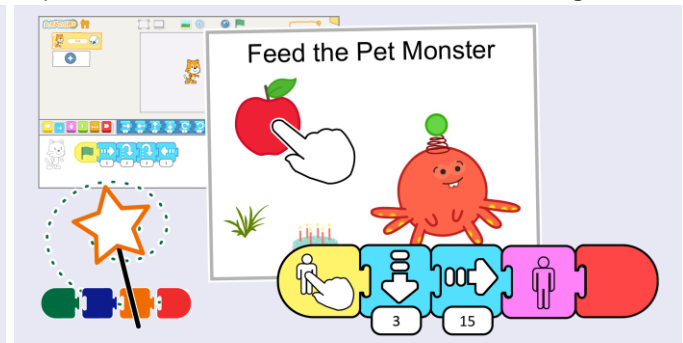

TechnoMe

Create an All About Me slideshow.

TechnoWhiz

Explore ScratchJr to code scenes and games.

Junior Projects

A collection of 14 projects teach **essential** technology skills. Code a game, design a report, animate a cartoon, graph data, and more!

TechnoCandy

Analyze data to boost candy sales.

TechnoEditor

Edit a publication. Gain word processing skills.

TechnoInternet

Become a responsible digital citizen.

TechnoJournal

Journal about personal experiences.

TechnoPresenter

Create a presentation with speaker notes.

TechnoResearch

Design a fact card about a topic.

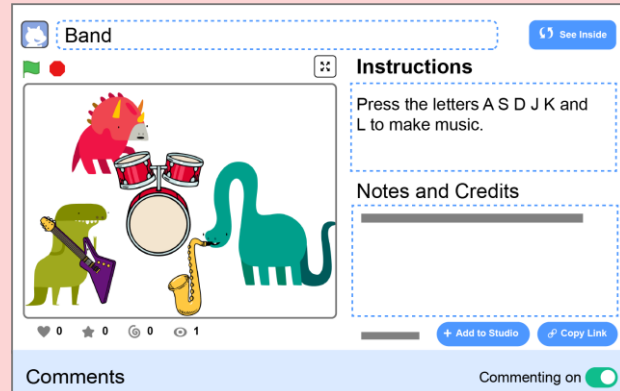

TechnoToon

Animate story events in Slides or PowerPoint.

TechnoArcade

Code games using Scratch.

Step-by-step instructions guide beginners to build original games such as Jumble Tumble, Let's Jam, and Mystery Island.

"This product is **easy to teach** and the students are engaged.
The teacher guide is a great resource and **easy to use**. Love Technokids Projects!!

K. Russell, Coral Academy of Science MS, Reno, NV, USA

TechnoSite

Build a site with links to fun places for kids.

TechnoSales

Calculate and graph data for a bake sale.

TechnoRace

Code a game. Score points. Avoid obstacles.

TechnoTimeline

Summarize significant events.

TechnoTrivia

Invent a trivia game for friends to play.

TechnoTurtle

Program using the Python Turtle Library.

Intermediate Projects

A collection of 14 projects develop **proficiency**. Publish a biography, program a treasure hunt, build a website, and more!

TechnoBiography

Celebrate a person's achievements.

TechnoBot AI

Solve problems using artificial intelligence.

TechnoBudget

Budget a shopping trip. Justify decisions.

TechnoCode

Code animations and games.

TechnoDebate

Debate the pros and cons of an issue.

TechnoEnvironment

Create publications to raise awareness.

TechnoFuture AI

COMING SOON!

TechnoHTML

Develop a web page using HTML and CSS.

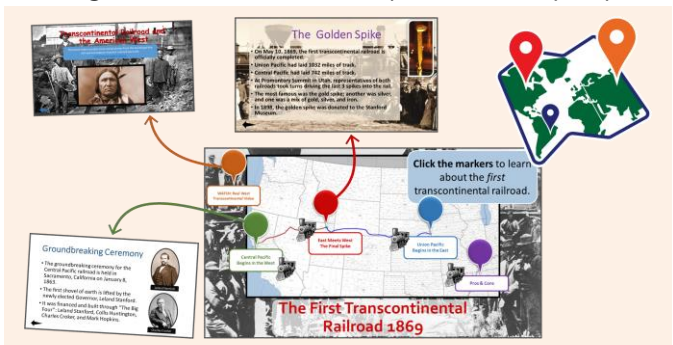

TechnoEarth

Build an infographic using Google Apps.

TechnoMap

Design an interactive map about any topic.

TechnoPython

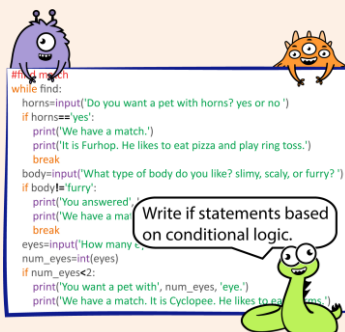

Program a series of games.

Do more than copy lines of codes. Use Python text-based programming to design original programs. Develop scripts using variables, loops, functions, and conditionals.

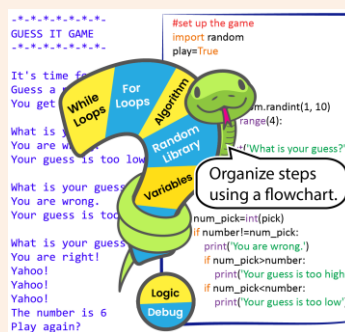

Pet Monster Rescue Mission

Ask questions to match a person to their pet using logic.

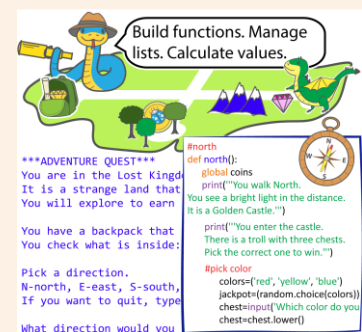

Guess It Mission

Build a guessing game. Can the player guess the number?

Adventure Quest Mission

Create a text-based adventure. Players earn coins and rewards.

"You guys are the best! My students that used your lessons 5 years ago still talk about them and how much more **computer literate** they are than their fellow college students because of them. Keep up the good work!"

D. Cash, The Children's Haven School, Austin, MD, USA

TechnoNewsletter

Create a fan club newsletter.

TechnoQuestionnaire

Investigate an issue. Interpret results.

TechnoRestaurateur

Launch a business venture.

TechnoTravel

Advertise a weekend getaway.

Senior Projects

A collection of 9 projects emphasize **real-world** applications. Prepare students for future learning and careers.

TechnoAd

Analyze data to produce a video ad.

TechnoAdvertise

Apply for a job at the TechnoAd Agency.

TechnoAnimate

Animate with motion and shape tweens.

TechnoInvestor

Trade stocks. Build an investment portfolio.

TechnoSpecialist

Create an info packet on hardware.

TechnoPlanner

Operate an event planning business.

TechnoMission

Organize data in a database.

TechnoPhotoshop

Retouch, crop, and superimpose images.

TechnoWonderland

Promote an amusement park.

Word & Excel

New Attractions Survey Report

Problem

There has been a decline in pre-teens and teenagers visiting the amusement park. This age group was surveyed to discover the types of attractions they like. This information will be used to select a new addition to the park.

Attractions

- Tornado Coaster
- Horror Maze
- Go-Carts
- Hot Air Balloon
- Bungee Jumping

Survey Results

- The most popular attraction was Tornado Coaster.
- The least popular attractions were Horror Maze and Hot Air Balloon.

Solution

Based on the survey results Tornado Coaster should be added to the amusement park. Tornado Coaster was the most popular ride. This should help increase visitors to the park.

Price List

TechnoKids Curriculum is designed for classroom teachers, computer instructors, media specialists, librarians, and computer science educators. When you buy a project or Collection your school is granted a site license.

About the Site License

- Use TechnoKids Curriculum at a **single location** such as a school.
- No need to count teachers, students, or devices.
- Multiple site discounts available.

	per site
Project	\$49
Primary Collection 9 projects	\$199
Junior Collection 14 projects	\$329
Intermediate Collection 14 projects	\$329
Senior Collection 9 projects	\$199
Complete Collection All TechnoKids projects	\$699

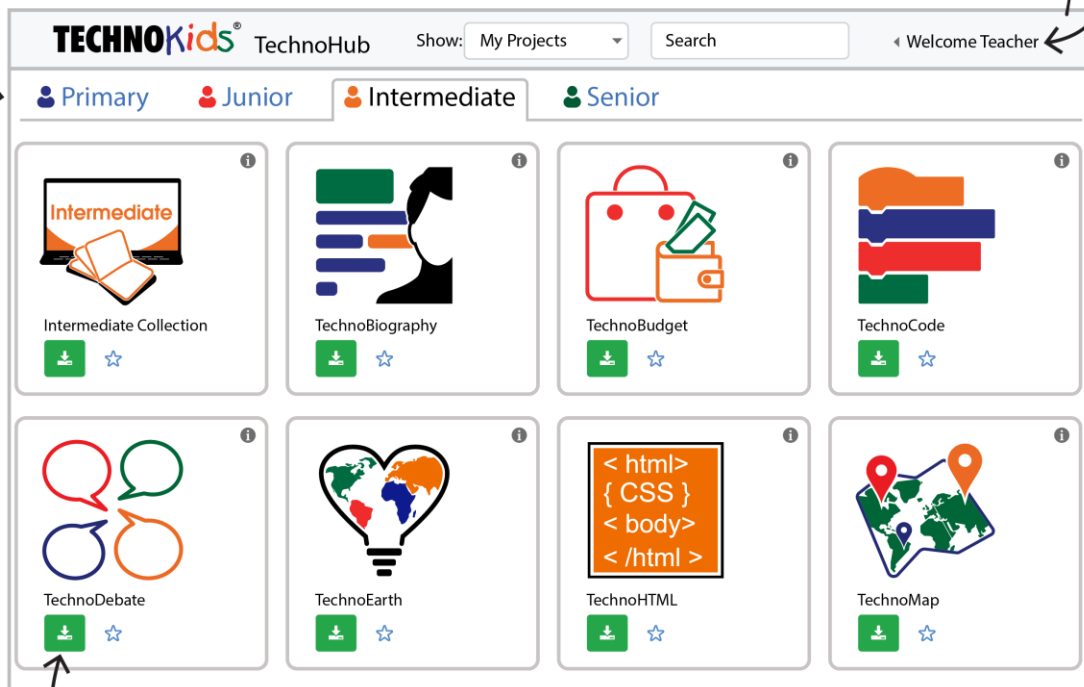

A site is a single location, such as a primary school, elementary school, middle school, high school, learning center, or home school.

TechnoHub

When you purchase TechnoKids Curriculum you are given a TechnoHub account. TechnoHub is an online library. Teachers must sign in to download technology projects.

Projects are on bookshelves

Sign into the online library

Download the latest instructions!

About Your Online Library

- Never lose your files.
- Login online from any device, anywhere, any time.
- Download instructions that match your software.
- New projects are automatically added to purchased Collections.
- Access toolbar summaries and flashcards from a Resource Center.

Frequently Asked Questions

How long does it take to teach each project?

Each assignment in a project takes 30–60 minutes. Students that have lessons twice a week can complete a project in 360–600 minutes or about 6–8 weeks. A project can be finished in about 2–3 weeks if class time is allocated every day.

How many projects can I teach in one year or semester?

You can complete between 3–5 projects per school year at the elementary school level. A high school student would be able to achieve the same number per semester.

What do I get when I purchase a technology project?

A project includes a PDF teacher guide, PDF student workbook, and resources. Personalize instructions using customizable assessment tools, examples, templates, and handouts.

What hardware is required?

Assignments can be completed using any desktop computer, tablet, or laptop. This includes Windows devices, Chromebooks, and iPads.

What software is required?

The software you require depends on the project you intend to teach:

- **PDF Reader:** To view the teacher guide and student workbook files students must have access to a PDF reader such as Adobe Reader or Kami.
- **Google or Microsoft Office:** Projects are available for Google and Microsoft Office.
- **Programming Apps:** TechnoKids has several programming projects. They require an HTML Text Editor (Notepad or web-based), Scratch, ScratchJr, or IDLE Python.
- **Adobe:** Two projects use Photoshop and Animate. This requires an Adobe subscription.

Will TechnoKids projects work with my Learning Management System (LMS)?

Teachers can create assignments and distribute worksheets, templates, or samples using the features of their LMS (e.g., Google Classroom, Schoology, Canva, or Microsoft Teams).

Do I get free curriculum support?

Yes. Call 1-800-221-7921 or email support@technokids.com.
