Technology Project using  
**Microsoft Word**  
Journal to express ideas.

In this project, students are introduced to word processing by creating a personal journal. Using Microsoft Word, they write a series of entries. Students describe a recent event, make a note of favorite things, and list personal wishes. The text on each journal page is formatted and pictures are added to produce an appealing, eye-catching booklet.

## *Understand the Big Picture*

Not sure where to integrate TechnoJournal? There are three samples provided for this project. The first sample is a typical creative writing journal. The second sample is a historical journal written from the perspective of a pioneer. The third sample is about a field trip. These samples provide ideas on how you can include these activities into your curriculum.
