# TechnoTrivia Overview

## Introduction to TechnoTrivia

In this project, students become quizmasters. They design a fun trivia quiz using Google Forms. Thought-provoking questions challenge players' knowledge about odd, interesting, and silly facts. The game will use a scoring system and answer key to provide helpful feedback. Upon completion, students host a Trivia Time Event to invite others to test their wits. Extension activities have students create a Pick Your Own Ending story, team up to build a Trivia Game, and host a Battle of the Brains.

Students complete the following tasks:

- In session 1, students test their wits. To jump start the fun, they are introduced to trivia quizzes by completing the Wacky Animal Quiz. Once familiar with the structure and purpose of this type of game, students rate their quizmaster type. Get ready to entertain friends and family with odd, silly, and interesting questions.
- In session 2, students build a trivia quiz about their country. It will test knowledge about the capital city, flag, landmarks, facts, and national symbols. Students will learn how to pose questions, set the point value, and create an answer key. This activity provides an understanding of Google Forms features and the structure of a quiz.
- In session 3, students become quizmasters. They design a trivia quiz for their family and friends to play. To start, they brainstorm topic ideas. Once they have selected a theme, they formulate a plan. An organizer is used to record the questions, correct answers, and points. Students apply helpful tips to generate thought-provoking questions.
- In session 4, students build their trivia quiz using Google Forms. They follow their plan to create the questions, scoring system, and answer key. Upon completion, the quizmasters conduct tests to verify the game is working properly. They then assess the quality of the trivia quiz using a checklist to highlight areas for improvement.
- In session 5, students take part in a Trivia Time Event. Students invite others to take their quiz. They then test their knowledge by taking quizzes made by classmates. Who is a know-it-all?
- In session 6, students analyze players' answers to the trivia quiz. Using Google Forms, they view a summary of responses. Graphs for each question illustrate the items that players found easy and difficult. Based on their evaluation, they make recommendations on how to change the trivia quiz to make it even better.

## Technology Integration Ideas

By formulating questions to build a trivia quiz, TechnoTrivia offers a fun way for students to develop critical thinking, improve information recall, and enhance communication skills. The trivia theme can be about a unit of study or based upon personal interest. Discover how to integrate TechnoTrivia into language arts, mathematics, social studies, geography, history, or science. There are many ways to integrate TechnoTrivia into curriculum:

- *Spelling Bee*: Expand vocabulary. Host a competition that has participants identify the definition, find the misspelled word, or spell a term correctly.
- *Reading Response*: Form a connection to text. Respond to a novel or short story. Design a quiz that has readers match a character to a statement, describe the setting, or determine the significance of an event.
- *Grammar Exercise*: Practice grammar skills. Create an activity that challenges classmates to punctuate a sentence, recognize parts of speech, or pick the correct homonym.
- *Drill and Practice*: Master basic addition, subtraction, multiplication, or division facts. Produce a simple worksheet that has students choose the correct answer or complete an equation.
- *Brainteaser*: Boost reasoning. Construct a brainteaser with word problems or puzzles that test a person's wit.
- *Unit Study Guide*: Prepare for an upcoming test. Develop a study tool that focuses on the meaning of keywords, recall of essential facts, and the importance of key concepts.
- *Civic Pride Contest*: Celebrate your country. Invent questions that has fellow citizens label capital cities, finish the national anthem, or select famous places.
- *Where in the World?* Showcase a place. Use map outlines, flags, tourist attractions, and tidbits of information to explore the importance of a location.
- *Local Legend Quiz*: Appreciate your hometown. Invite community members to answer trivia about local sports teams, current events, sites, or personalities.
- *Who am I? Riddles*: Acknowledge significant people and their contributions. Generate riddles using famous quotes, photos, or achievements to provide clues to their identity.
- *Historical Timeline*: Determine the importance of events. Invent a quiz that has history buffs identify dates, sequence events, and pinpoint the cause or effect of an incident.
- *Research Review*: Gain a deeper understanding of scientific concepts. Create a review to help fellow classmates recall experimental steps, results, and meaning of findings.
- *Name that Tune*: Host a music tournament. Test competitors' ability to select the correct song line, title, or artist.
- *Wacky News Stories*: Explore current events. Questions include sensational headlines with information about the news story. Players must determine if they are true or false.
- *Pick Your Own Ending Story*: Transform the quiz feature into a short story that has readers pick what happens next. The decision affects the ending. (See Extension Activity 3)
- *Trivia Game*: Invent a game to entertain your friends. Divide questions into categories using sections. (See Extension Activity 5)
- *Battle of the Brains*: Design a trivia game that collects the name and email address of participants. Analyze results to declare a winner. (See Extension Activity 6)
- *Art Crawl*: Appreciate art. Design a gallery walk that includes questions about famous painters, paintings, and techniques.
