

Hey! Thanks for clicking the link.

At this time, this product is marked COMING SOON.

Over the coming months, TechnoKids is developing a series of project-based activities that blend robotics, coding, and digital literacy. The lessons will spark creativity with open-ended challenges. Students can plan a treasure hunt, tour a zoo, or blast-off to a new planet.

When you purchase a robotics kit, instantly you will have access to TechnoHub, an online library where you can download TechnoKids technology projects that match your STEM robotic kit.

We look forward to sharing them with you!
