

Assignment 7 Compare Search Engines

Not all search engines find the same websites. They show different results.

Use your skills to find **free online games for kids** using different search engines. Compare the search results. Which search engine is the best? Why?

1. Pick **three** search engines from the list. Or ask your teacher which ones you should use.

www.bing.com	www.google.com	www.yahoo.com
www.ask.com	www.duckduckgo.com	primaryschoolie.com

2.
 - ▷ Open the Chrome web browser.
 - ▷ Type the **URL** for the first search engine in the address box.
 - ▷ Click *New tab*. Type the **URL** for the second search engine in the address box.
 - ▷ Open the third search engine in a new tab.
 - ▷ Click on each tab to switch from one search engine to another:

3. Use the same keyword to find **free online games for kids**. Complete the chart to compare the search engines.

Search Engine	URL of first result	Features
		<input type="checkbox"/> easy to fine-tune search results <input type="checkbox"/> results are quick to scan <input type="checkbox"/> all results seem to be what you want
		<input type="checkbox"/> easy to fine-tune search results <input type="checkbox"/> results are quick to scan <input type="checkbox"/> all results seem to be what you want
		<input type="checkbox"/> easy to fine-tune search results <input type="checkbox"/> results are quick to scan <input type="checkbox"/> all results seem to be what you want

- a. Is the first search result the same for all search engines? yes no
- b. In the feature in the chart put a star ★ beside the search engine that does it the best.

- c. Which search engine overall had the best features for finding online games? Why?
