

TechnoGallery is an introductory digital art project that blends visual arts with technology. The activities develop art concepts as well as fine motor, keyboarding, and basic computing skills.

My Gallery

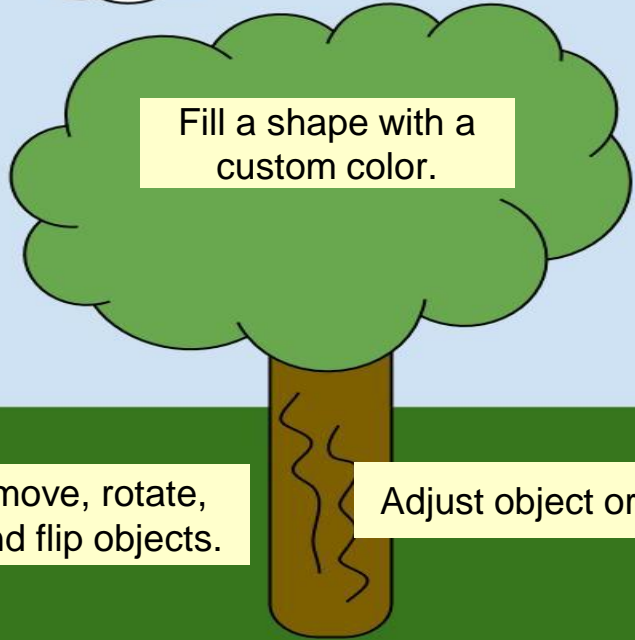

by Student Name

In TechnoGallery students produce an animated art gallery. They share their artwork and explain their artistic choices during a digital art show.

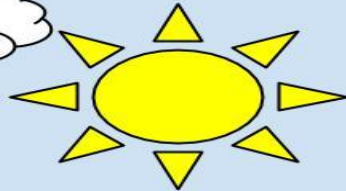

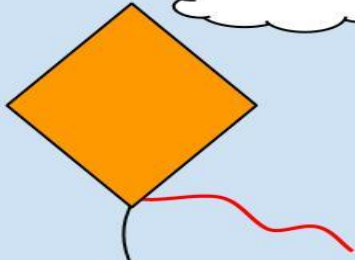

Explore lines. Draw straight, jagged, and curvy lines. Use line to express an emotion.

Apply a slide background to insert a picture frame that suits the painting.

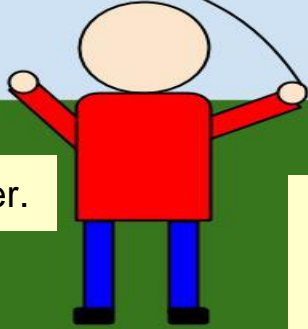

Fill a shape with a custom color.

Format line color, width, and style.

Scale, move, rotate, bend, and flip objects.

Adjust object order.

Explore shapes. Combine shapes to make objects. Create a picture that tells a story using lines and shapes.

Be Creative with Words - Ideas:

- ✓ Write family members' names
- ✓ Create a motto
- ✓ Describe a favorite animal
- ✓ Tell about a holiday or event
- ✓ Share an inspirational message

Discover formatting options for text and WordArt. Use skills to create artwork that shares a message.
